Year

2022 2025

Key Insights:

• Revenue grew 50% from 2022 (PKR 315M) to 2025 (PKR 473M), while net income grew even faster at 69%, the business is getting more profitable, not just bigger.
• PakTech Solutions is the efficiency leader with a 25% net margin, vs 6–9% for the other two, worth studying what it does differently.
• The mid-2023 dip hit hardest in retail (BrightLeaf's monthly profit fell to PKR 0.15M), but all three recovered; the forecast projects growth continuing into 2026.

Balance Sheet & Cash Flow

Key Insights:

• Total assets more than doubled (PKR 111M → 248M), funded mainly by retained profits, equity grew from 75M to 196M.
• The business is deleveraging: debt-to-equity fell from 0.48 to 0.26, growth is funded by profits, not borrowing.
• Operating cash flow is positive every year and growing (40M → 65M); steady investing outflows show continuous reinvestment, and cash reserves nearly tripled to PKR 41M.
